Forecast For The United Kingdom
Issued by Met Office Exeter
at 1400 on Thursday 25 Feb 2021

UK Outlook for Friday 12 Mar 2021 to Friday 26 Mar 2021:
Settled conditions are likely to continue, though Atlantic frontal systems may make more progress across the country at times, introducing occasional wetter weather. However, the overall signal suggests drier than average weather with near normal temperatures are most likely for the rest of the period, though occasional colder spells cannot be ruled out.
